

ENVIRONMENTAL POLICY

Scope

- This policy applies to all Sentinel Metals activities, employees, contractors, and partners in Montana, USA.

Legal Compliance

- Comply with the Montana Metal Mine Reclamation Act, MEPA, Water Quality Act, Clean Air Act, and all DEQ permits
- Obtain and maintain all licenses and authorisations required for exploration.

Environmental Protection

- Minimise land disturbance and use low-impact exploration methods
- Prevent pollution of air, water, and soil through best-practice controls
- Manage weeds, rehabilitate disturbed areas progressively, and use native species for revegetation
- Protect biodiversity, endangered species habitat, streams, and sensitive ecosystems
- Identify and protect cultural and heritage resources.

Sustainability & Community

- Use resources efficiently and responsibly
- Engage openly and respectfully with landowners, tribes, and local communities
- Provide environmental training for staff and contractors.

Continuous Improvement

- Monitor environmental performance and report transparently
- Audit compliance and update practices to reflect changing laws, science, and community expectations
- Foster a culture of accountability and continuous improvement.

Our Goal

- To conduct exploration that meets Montana's environmental standards, supports sustainable development, and protects the land, air, water, and communities for future generations.
